

## Hackney Road Housing Development

### Project Facts

Sector: Basements

Our Role: Package Contractor

Location: Hackney Road, London

Client: London Wharf

Project Value: £900,000

Duration: 7 months

### Overview:

This project comprised the construction of a 5 storey reinforced concrete frame with a basement. Working within a tight inner city site surrounded on 3 sides by roads and to the fourth side an existing building.

### Scope of Works:

Natta's works included the temporary works sheet piling and frame due to the location of the existing roads, piling works and pile caps. The waterproofing of a concrete basement, including insulation and construction of a 5 storey reinforced concrete frame with insitu concrete stairs, lift shaft, drop beams and upstands. The drainage works comprised internal – cast iron, external – connections to existing mains.

### PROJECT ACHIEVEMENTS

*Our client commented on the quality of our RC frame finish and our non-adversarial approach"*
