

NEW COVENT GARDEN PLAZA

Project Facts

Sector: Commercial

Our Role: Sub Contractor

Location: Covent Garden, London

Client: Vinci / St. Modwen

Project Value: £5.5m

Overview:

Currently we have been awarded four works packages: infrastructure to the development, concrete works, adaption works to an existing multi-storey car park and the removal of existing concrete hard standings, together with the new entrance Plaza.

Scope of Works:

All of the above packages had to be undertaken whilst the market was open which required considerable interfaces with all the stakeholders.

We are very pleased to be involved in the Covent Garden development. The nature of the site and extended development programme entails multiple work faces at the same time with diverse skills.

We hope that we will keep the excellent working relationship with Vinci/St. Modwen moving forward.
