

DAEDALUS WATERFRONT - LEE-ON-SOLENT

Project Facts

Sector: Infrastructure

Our Role: Main Contractor

Location: Hampshire

Client: Homes & Communities Agency

Project Value: £6m

Duration: 12 months

Overview:

Project is comprised of estate roads and footpaths, services, deep drainage, 9m deep pump station and landscaping.

Scope of Works:

Part of a Major mixed-use waterfront development opportunity fronting the Solent, suitable for commercial, leisure and residential development. The site has been developed for military purposes since 1917 and forms part of the larger Daedalus Estate, 450 acres, which includes an operational civilian airfield, a search and rescue facility operated by the Maritime and Coastguard Agency, a college and a new Business Park, currently under construction.

Our scope includes grinded anger boring of 300 and 600ft sewers, remediation of land, working with contaminated soils and water, construction of the main infrastructure roads and sewers in challenging ground.

The project also requires installation of new water mains, HV electric services together with diversions of HV, LV, BT and water services. The work will also comprise of an upgrade and expansion of Ross House Junction together with bounding modifications. Also installing over a kilometre of twin raising main across Daedalus airfield.
