

East Bridgford Garden Centre

SECTOR:

Building, Garden Centres

OUR ROLE:

Main Contractor

LOCATION:

East Bridgford,
Nottinghamshire

CLIENT:

Bridgford Garden
Centres

PROJECT VALUE:

£6.2m

OVERVIEW:

Our Contract was to Design and Build a new 7000m² Garden Centre on land adjacent to an existing, much smaller Garden Centre.

SCOPE OF WORKS:

The scope included the site clearance, cut and fill, carparks, services, drainage, foundations, floor slabs, steel frame, wall and roof cladding including Polycarbonate panels.

The project also required an overhead HV diversion and a new sub-station, air source heating system, PV panels and new section S278 entrance junction, together with boundary fencing and lighting.

The co-ordination with the adjacent trading Garden Centre, an Indian restaurant and a petrol station was paramount to the build. This fast-track programme saw the store ready for fit out in 8 months. The full handover of the new store was completed within 12 months.

“We are very proud of this 7000m² of new Garden Centre. It is one of Natta’s largest Superstructure builds to date. With one of the worst winters on record, it proved challenging at times. We got it over the line, on time and on budget.”

Matt Sainty

COMMERCIAL DIRECTOR, NATTA
