

Hartswood

SECTOR:

Housing

OUR ROLE:

Main Contractor

LOCATION:

St George's Hill,
Weybridge

CLIENT:

Private Client

PROJECT VALUE:

£2.6m

DURATION:

80 weeks

OVERVIEW:

We were contracted to carry out the shell and core element of this 16,500 ft² mansion with attached 5,000 ft² underground garage.

SCOPE OF WORKS:

The house's core was of reinforced concrete, basement and frame, infilled with blockwork and Metsec framing, ultimately overlaid with render and stone effect cladding.

The roof was a combination of slate on pitched areas and Trocal membrane on flat areas. Installation of sash windows, steel curved and spiral staircases completed our package.

We were then engaged to act as principle contractor to provide engineering and logistics support to individual fit our trades employed by the client direct.

We were also been engaged to complete the external landscaping to the property, to enable us to see the project through from start to finish.

See next page for more

“We were thrilled to have been awarded further works on this project to see the property build through to completion.”

Matt Sainty

COMMERCIAL DIRECTOR, NATTA
