

Longcross Upper

SECTOR:

Civil Engineering,
Groundworks,
Infrastructure & 278
Works

OUR ROLE:

Sub Contractor

LOCATION:

Surrey

CLIENT:

Crest Nicholson

PROJECT VALUE:

£7.5m

DURATION:

2 years

OVERVIEW:

Infrastructure and groundworks to a 108 housing unit residential scheme.

SCOPE OF WORKS:

The site is specified with a very high level of finishing incorporating granite kerbs and paving.

The project has required extensive co-ordination in maintaining the production on site, whilst not interfering with: filming at Longcross Studios, test driving at the race track and maintaining access to other tenants and new purchasers.

Our scope is the entire groundworks and infrastructure up to and including ground floors. This encompasses all: roads, drainage, hard landscaping, vibro piling together with superstructure foundation, block work, beam and block floors.
