

Mill Road

SECTOR:

Civil Engineering,
Basements

OUR ROLE:

Sub Contractor

LOCATION:

Mill Road, Hertford

CLIENT:

Redrow Homes

PROJECT VALUE:

£2.5m

DURATION:

12 months

OVERVIEW:

This project has two distinct parts: a reinforced concrete basement and podium slab, together with a traditional housing site, roads and sewers external works.

SCOPE OF WORKS:

All of the site was piled; the ground had contamination. Our package for the basement and podium slab included provision of a Tower Crane.

The site was adjacent to Hertford Train Station and two busy roads, which constrained access and crane positioning.

The reinforced concrete works were completed 4 weeks ahead of programme.

See next page for more

“Natta undertook a tricky site with energy and skill. The quality is excellent and we are very pleased with the product.”
