

Melksham

SECTOR:

Infrastructure & 278
Works, Modular

OUR ROLE:

Sub Contractor

LOCATION:

Wiltshire

CLIENT:

Statera Energy

PROJECT VALUE:

£3m

DURATION:

8 months

OVERVIEW:

Following on from our work in Enderby, Natta were awarded another contract from Statera Energy Limited for a new Battery Storage Facility in Melksham.

SCOPE OF WORKS:

The works on this project were comprised of bulk earthworks, access roads, drainage, fencing and service trenching and ducting. As well as this, containers, sub-stations, distribution board bases and ancillary stations were also constructed.

We worked to a strict timetable to complete this project in order to coincide with the delivery of storage and electrical equipment.

These works required a high level of accuracy to ensure we delivered a quality finish on time.
