

St Luke's Hospice

SECTOR:

Building, Care Homes

OUR ROLE:

Main Contractor

LOCATION:

Basildon

CLIENT:

Skye Strategic Laindon Land

PROJECT VALUE:

£4m

DURATION:

1 year

OVERVIEW:

Our Contract was the full design and build of a new six-bed hospice in Basildon.

SCOPE OF WORKS:

The hospice was designed to be a hub for the care of local people and their families with life limiting conditions.

The new building contains a range of on site services as well as the ability to support in-home care for the local community.

Now completed, the building has six care bedrooms, relative rooms, quiet rooms, break out rooms and connecting gardens. It also includes on-site kitchens, a pharmacy, a shop, a café, an education centre, an office, staff facilities and specialist rooms.

All of the building and its surroundings were designed to provide a calm environment with full medical facilities to make the experience for guests and staff as pleasant as possible.

Great attention to detail was required by the build team to meet the specifications and to coordinate with specialist traders and suppliers. The end product is a beautiful building with a great purpose.

See next page for more

“We were delighted to be involved with this project. The new hospice has provided a valuable asset to the local community”

John Whelan

MANAGING DIRECTOR, NATTA
