

Kao Park Data Centre

SECTOR:

Data Centres,
Groundworks

OUR ROLE:

Sub Contractor

LOCATION:

Harlow

CLIENT:

JCA

PROJECT VALUE:

£5m

DURATION:

12 months

OVERVIEW:

We were contracted by JCA to construct the groundworks and civils element of a large data centre in Harlow.

SCOPE OF WORKS:

The scope of works on this project was a traditional groundworks package. With this, the contract consisted of roads, sewers, earthworks, pile mats, ground beams, service installations and hard landscaping.

All works were carried out to a rapid programme and as always, to a high-quality standard development. The hard and soft landscaping to the properties is of a high standard which added to what is a highly desirable street scene and a very successful project.
