

Ajax Avenue, Slough

SECTOR:

Data Centres,
Groundworks

OUR ROLE:

Sub Contractor

LOCATION:

Slough

CLIENT:

Wates Group

PROJECT VALUE:

£7m

DURATION:

12 months

OVERVIEW:

Natta were awarded the contract by Wates Group to undertake the groundworks for a new Data Centre development at Ajax Avenue in Slough.

SCOPE OF WORKS:

The works on this fast-track package included earthworks, substructures, drainage and external works.

The project was split into three distinct data halls and required us to work closely with preceding and following trades to ensure all works are integrated.

A large amount of service trenching and ducting were involved which had a considerable impact on logistics and interfaces with drainage and external works. As well as this, the foundations on site were deep and large mass concrete bases required considerable care in their construction.

These works were delivered promptly and to programme.

See next page for more

“We’re excited to continue our partnership with Wates Group on this project as we expand our capabilities into the Data Centre development field.”

Matt Sainty

COMMERCIAL DIRECTOR, NATTA
