

Dunsfold Airport

SECTOR:

Groundworks, 278 Works
& Civil Engineering

OUR ROLE:

Main Contractor

LOCATION:

Cranleigh

CLIENT:

Dunsfold Airport Ltd

PROJECT VALUE:

£6m

DURATION:

12 Months

OVERVIEW:

Natta undertook the construction and groundworks for a new roundabout and access road for Dunsfold Airport, in Cranleigh, Surrey.

SCOPE OF WORKS:

This project included the construction of a new roundabout and access road to serve as a grand entrance to the Dunsfold Park development.

The access road provides a direct link from the A281 to the main Perimeter Road within the Aerodrome site. This design ensured that there was minimum disruption of traffic to the local area.

The road follows the line of the old runway and provides a wide avenue into the development.

Extensive landscaping with mature tree planting, large drainage swales and wide cycleway footpaths were added to the project's scale and introduced significant visual impact.
