

Longcross

SECTOR:

Infrastructure

OUR ROLE:

Main Contractor

LOCATION:

Chertsey, Surrey

CLIENT:

Crest Nicholson

PROJECT VALUE:

£2.5m

DURATION:

7 months

OVERVIEW:

Natta were the Principal Contractor for this Section 278 works. The works comprised a major roundabout, entrance bellmouth and access road that form the entrance for 115,000m² of offices and 200 dwellings. The client's requirement was to produce a high quality public landscaped area embodying quality designs, materials, planting and landscaping. The whole site covers an area of approximately 4.13 hectares and comprises former storage, test laboratory and barracks buildings currently occupied by a film studio for film sets and production offices.

SCOPE OF WORKS:

The main objective of this contract were to create a unique entrance that is visually impressive from the nearby passing road. This was achieved by the erection of a series of dry stone sentinels ranging in height from 3.5m to 2m together with a planted veil of native hedging to provide a three-dimensional aspect to this entrance feature. As part of introduction of the new roundabout, the works required major service diversions prior to the installation of new kerbing for filter lanes and new access road, lighting and signage, whilst maintaining existing entrances for the property users. As part of our solution we erected a temporary steel bridge to allow vehicle access over open service corridors. The building of the quality finished areas involved the timing of very long material lead times from Germany, China and Holland. Our supply chain was fundamental in achieving the multifaceted scope.

Natta completed this project on time and are tendering for further Infrastructure packages on the site. We were also nominated for 'Contractor of the Year 2014' by Crest Nicholson.

Natta was then awarded The Considerate Constructors Certificate for Performance beyond Compliance.

“This is a well presented and well run site particularly considering the nature of the works being carried out. The Contractor has a good working relationship with the existing users.”
