

Aaron Stride

Civil Engineering Degree Apprenticeship Case Study

About Aaron

Aaron has started an exciting journey undertaking the Level 6 Civil Engineering Apprenticeship with London South Bank University. Immersing himself in this five-year degree, he is unlocking the skills and knowledge essential for a thriving engineering career, whilst gaining valuable hands-on experience.

Skills Learnt

- ✓ Professional Development
- ✓ Professional Communication
- ✓ Learning FIR Policies
- ✓ Organisation and Attention to Detail
- ✓ Time Management
- ✓ Learning Supply Chain Processes
- ✓ Learning Business Processes

“So, picture this: you’re an Apprentice on a project that’s slowing down. Natta doesn’t let you stagnate on that project. They move you on to another one, ensuring that you’re learning continuously”

Aaron Stride, Civil Engineer Apprentice

Feature Projects

**Woodford Green
Care Home**

Aaron has been part of the team delivering a 120-bed care home for Morrison Care Group. The works include demolition of existing structures, construction of new foundations, a retained basement, and the superstructure above, providing him with valuable exposure to complex building techniques and sequencing.

**St Neots
Wintringham**

Aaron has also supported work at St Neots Wintringham, where Natta is delivering a foul rising main for Urban & Civic. This project includes three road crossings, the installation of valve chambers, temporary works, and earthworks, as well as landscaping and adoptable footway replacement, giving Aaron insight into infrastructure and civil engineering operations.
